Value Proposition

As the world's first neutral orchestrator for transport and logistics, TRI-VIZOR proactively designs and operates horizontal partnerships and collaborative communities among shippers.

By bundling and synchronizing freight flows across multiple supply networks, we create double digit gains in cost, customer service and sustainability for our clients.

Expertise Offering

Shippers in Wallonia who wish to investigate the potential of horizontal collaboration, are invited to contact us.

We can perform a « synergy quickscan » of your European logistics network to identify other companies with overlapping volumes and tradelanes.

We can also help you to set up a win-win operational partnership.
